It was the first domestically built compact pickup of the big three American automakers. A highperformance version was released in 1991 and given the name of GMC Syclone. The pickup was also sold by Isuzu as the Hombre from 1996 through 2000, but only in North America. An electric version was leased as a fleet vehicle in 1997 and 1998. <http://obraz-tlt.ru/userfiles/canon-mx310-online-manual.xml>

Together, these pickups are often referred to as the Sseries. The first Sseries pickups were introduced in 1981 for the 1982 model year. The base engine manufactured in Japan and imported was a 1.9 L Isuzu fourcylinder RPO LR1 shared with the LUV and Isuzu Pup, with a 2.8 L V6 as an option. The Chevrolet and GMC models were identical apart from the grille, tailgate and assorted insignia. Following the popularity of the Jeep Cherokee, 4door SUV variants were introduced in March 1990 as 1991 models alongside the badgeengineered Oldsmobile Bravada. The OHVderived 2.2 L diesel engine and 1.9 L SOHC gas engine, both from Isuzu, were gone the next year, leaving just the Iron Duke and updated 2.8 L V6. A muchwelcomed 4.3 L V6 was added for 1988, and antilock brakes came the next year. The GMC Syclone also appeared that year. The Sonoma GT bowed in 1992. Added to this was the 4.3 L V6 Vortec Wcode engine. This generations last year was 1994. The Baja was available in three colors Midnight Black, Apple Red and Frost White. When first introduced in 1989, the Cameo had three color choices; Apple Red, Frost White or Midnight Black. Other appearance packages included the S10 Back Country, predecessor to the Baja, the S10 Top Gun edition, the GMC Sonoma SST, the GMC S15 Gypsy Magic and GMC Jimmy Magic. All of the special models the Syclone, Typhoon, and Sonoma GT were discontinued, but the changes to the pickup brought it in line with its major competitor the Ford Ranger. In compliance with the Clean Air Act, all second generation S10s and Sonomas equipped with air conditioning used CFCfree R134a refrigerant beginning in the 1995 model year. The all new 1995 S10 didnt offer any airbag, presumably as a temporary measure to economize the introduction of the new body styles, as well as to gradually phase out steering wheel designs that didnt accommodate for airbags, though the vehicle itself was slated for airbag

capability.<http://www.timocomputer.cz/files/canon-mx310-on-screen-manual.xml>

Sport utility models Blazer, Jimmy, Bravada came with thicker front and rear sway bars. This was also the year that GM introduced the ZR2 offroad package. In 1996 the 4.3 L engine was refreshed, and a third rear door was added for extended cab models, along with the sportside bed option. In 2001, a crew cab option was added and was only available with fourwheel drive and an automatic transmission. For the 2004 model year, the regular and extended cab models were discontinued; only the crew cab model was retained. The 14inch 360 mm wheels used on the first generation were discontinued. The SS was discontinued in 1998 and was replaced by the S10 Xtreme for the 1999 model year. A stepside version was available from 1996 to 1998 and until 2003 on the Xtreme. The Hombre differed from its GM siblings mostly in the front sheetmetal, with different lights, grille, front bumper and front fenders, which were more flared out. The rear quarter panels were also different, as they had a slight flare over the wheel well to match the front fenders. The Hombre had a much smaller range of equipment options compared to the S10 and Sonoma; a Spacecab extended cab, V6 engine and fourwheel drive were added for 1997 and available until 1998. Hombres were also available with the S10s aluminum wheels with Isuzu center caps. It would be another six years before Isuzu reentered the pickup market with the iSeries, which formed the basis for the S10s successor, the Colorado. For 2015 models, the diesel engine was refreshed, resulting in an increased power output of 200 hp. Also, for the first time in Brazil, Chevrolet offered the flexfuel S10 with fourwheel drive.
