To get started finding bose 3 2 1 series ii manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

## Book Descriptions:

# bose 3 2 1 series ii manual

CAUTION Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure. The DVD player should not be adjusted or repaired by anyone except properly qualified service personnel. These numbers are allocated according to where the player and disc are sold. No part of this work may be reproduced, modified, distributed or otherwise used without prior written permission. Dolby and the doubleD symbol are trademarks of Dolby Laboratories. Manufactured under license from Dolby Laboratories.

Confidential unpublished works. Save all packing materials, which provide the safest way to transport your system. Check to be sure your system includes the parts shown in Figure 1. If any part of the system appears damaged, do not attempt to use it. Notify Bose or your authorized Bose sheet included in the carton. Note The speakers can be mounted on Bose brackets, table stands, or floor stands. For order ing information, refer to "Accessories" on page 54. Additional or longer cables may also be ordered. Refer to the list of offices included in the product carton. Connecting the Acoustimass module to the media center Plug one end of the Acoustimass module cable into the Acoustimass Module jack on the rear of the media center Figure 6. Figure 8 Separating left and right speaker cords 3. Unwind the wires for each antenna to provide the best reception. Figure 10 Antenna connections FM dipole antenna. Making audio connections Note If your TV does not have audio output jacks, see "If your TV does not have audio output jacks". Before you proceed, you must determine if your TV has audio output jacks. Consult your TV owner's guide if you need assistance. To do this, you will need one additional video cable, which can be purchased at your local electronics store. Note For more information, or to purchase the video cables, contact your local electronics store or authorized Bose dealer. Netherlands

- **bose 321 series ii manual, bose 321 series i manual, bose 321 series iii manual.**

Use an optical digital cable or a coaxial digital cable, as appropriate, to connect this output to the digital input on the media center. You can purchase the required cables at a local electronics store. Con nect the video output of the game console to the C composite Video IN jack. Figure 18 Game console connections Game console connection panel. Voltage variations and spikes can damage electronic components in any system. A quality suppressor can eliminate the vast majority of failures attributed to surges and may be purchased at electronics stores. Be sure to perform step 4 and play the setup DVD. The setup DVD can help you verify that you set up your system cor rectly for proper sound performance. Requires special remote settings.Requires special remote settings.The symbol defines the function.Control panel The media center has six buttons located on the top control panel. Playing other sources Turn on any component connected to the media center by using the remote for that compo nent or controls on the component front panel. For that purpose, each source you use with this system has its own Settings menu with features appropriate to that source. To view the settings menus You can see the Settings menu for each source on your TV screen Figure 24 and on the display panel of your media center Figure 25. You can use the actions above to change back to the original default settings, too. Do that if you do not like the effect of a change you have made, or accidentally made a change you did not intend. Press Exit to remove the menu from the screen. Item CD settings menu To see the CD Settings menu, press CDDVD on the remote while playing an audio CD. Then press Settings. Then press Settings. Press Exit to remove the menu from the screen. There are no separate setting menus for these sources. Movie EQ, Range Compression and Mono Decoding appear in the menu only if Audio Processing is set to User

Adjustable. <http://magnachip.com/userfiles/20200907103654.xml>

If your system operates as you want it to, there may be no need for any changes. In some cases, however, changes are required to make the system fully compatible with the installation options you have chosen. Netherlands Svenska select navigate Description Media center display lights with a midrange brightness. Figure 31 Remote Control system options navigate System Option Settings TV Brand Brand name TV Device Code Code number CBL SAT Device. To activate this feature, you need to set a level of restriction and establish a password in the DVD Lock section of the System menu. Do not use any solvents, chemicals, or cleaning solutions containing alcohol, ammonia, or abrasives. Bose also offers cable adapters for use in running speaker cable through walls. For further information or to order the mounting brackets, stands, or cable adapters, contact your Bose dealer or Bose Corporation directly. This allows the unit to reset itself. For the remote setup procedure, see your owner's guide. To find available codes for a device, search the listing under the appropriate device type heading. We have 6 Bose 321 SERIES II manuals available for free PDF download Owners Manual, Service Manual, Quick Setup Manual. Integrated DVD player plays the most popular audio and video content. Proprietary Videostage 5 decoding circuitry delivers 5channel surround sound from any source. This combination offers most of the performance of premium 5speaker systems with just two visible speakers. Preset AM and FM Stations Up to 50 can be grouped in two groups. These groupings make it easy for family members to easily access their favorite stations or to have musical genres, such as all the jazz stations, grouped together. Easy Setup and Operation With Advanced OnScreen Menu and Icon system. 2 Digital Outputs One optical, one coaxial. True Surround 3D Sound For analog output.

Two Composite, Component and SVideo Outputs Child Lock and Parental Lock Functions Gemstone Speaker Arrays The two speaker arrays, combined with our TrueSpace surround digital processing circuitry, deliver extraordinary sound. They are also 50% smaller than the original 321 system speakers and blend into almost any decor. With removable grille. In the Box Bose 321 GS Series II Home Theater System, Consists of Receiver with builtin DVD Player, Surround 2 Speaker System and Subwoofer Silver Receiver with builtin DVD Player 2 Speakers Subwoofer Remote Control 1Year Parts and Labor Warranty Table of Contents Description 5.1Channel Receiver Proprietary Signal Processing Preset AM and FM Stations Progressive Video Processor Plays. See any errors on this page. Let us know YOUR RECENTLY VIEWED ITEMS Browsing History ON Clear History Not responsible for typographical or illustrative errors. Like those other two systems, the Bose 321 doesnt have videoconversion capabilities, so most users with multiple video sources will need to connect them directly to the TV instead of routing them through the 321 Series II. You can connect three audio sources through analog or digital jacks. The system is compatible with MP3 CDs and can decode Dolby Digital and DTS surround soundtracks from DVDs and external sources.

Surroundchannel sonic elements certainly werent as localized as they would have been with an actual 5.1channel speaker setup, but we experienced a few moments when sounds, such as effects in the Requiem for a Dream DVD, almost could have fooled us into thinking rear speakers were in play. When we ran the speakersetup chapter from the Video Essentials DVD, where sound moves through the room in a 360degree pattern, the sound convincingly traveled from the front of the soundstage to the sides of our listening position, though we noticed a hole in the sound directly behind us. On the other hand, music didnt have as much texture and detail as weve heard from better speakers.

The satellites and the subwoofer blended well, but the subwoofer sounded looser and less punchy than wed like. With the system connected to our HDTVs componentvideo input, DVD video looked good. Discs consistently played without any snags. Sonys DAVX1 offers more features, including the aforementioned connectivity extras, for less money. Denons more expensive S301 offers a similar compact form factor, iPod connectivity and control, and handsdown the best sound of the three. Although the Bose 321 Series II DVD homeentertainment system is a decent option for bedroom and

small hometheater installations, its middling sound quality just doesnt match its high price. Lets round them up. Here are some of the best. Lets round them up. CDs, VHS tapes, and even mono TV programs,that werent recorded in surround soundRegister a free business account Please try your search again later.Half the size of the original 321 systems speakers, Boses patented Gemstone speaker array works in concert with the systems TrueSpace surround processing to deliver a spacious, multichannel presentation from just 2 visible speakers and a hideaway Acoustimass module. Using Bose TrueSpace proprietary digital processing circuitry, the 321 GS.II system improves the sense of spaciousness imparted by stereo recordings and exciting movie effects from Dolby Digital and DTS surroundencoded materials. Yet its few parts require little effort to set up, so you can enjoy your new systems performance right awayit even comes with a helpful system setup and demo disc. Progressive scanning, referred to as 480p for the number of horizontal lines that compose the video image, creates a picture using twice the scan lines of a conventional DVD picture, giving you higher resolution and sharper images while eliminating nearly all motion artifacts. Proprietary Videostage 5 decoding circuitry goes beyond conventional digital technology to bring new life to old movies and music. It gives you a surround sound experience from practically any source, including older media such as videotapes, stereo CDs, even mono TV programs. Advanced postprocessing techniques automatically deliver a clear, onscreen audio center image and balanced surround sound, similar to that of a 5.1encoded DVD. In the Bose Acoustimass module, 2 downwardfiring drivers give you powerful performance for the lowest audible notes and effects. And proprietary Bose technology ensures that you hear with clarity the proper balance of deep lows from all channels for music and movies. Hide the module almost anywhere, even behind furniture, and all the sound seems to come from the small cube speaker arrays.

If you have other Bose hardware already in placea Wave music system, a 321 Series II DVD system, or a Lifestyle systemyou can hook it up to this 321 GS.II system using an optional 50foot Bose link B connection cable to extend your entertainment to an additional listening area. You can also expand upon the 321 GS.II system later by integrating it with a Lifestyle system. Note Bose recommends that you maintain at least 3 feet 1 meter of space between the 2 speakers with no more than 3 feet 1 meter between each speaker and the edge of your TV screen. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Fabio Arturo Penaranda 4.0 out of 5 stars Had heard it displayed in Bose store. At home, hooked to my new home theater system, it blew me away!!!! I cant get enough of it. I have a 1400square foot home, open floor plan and it more than fills the space. Get the dandy floor standsThe equipment even though many years old, was in good working condition. Each series has different functions. To control your Bose 321 system properly, both the series and the model number must be correct. The series is listed in the

user manual. If the user manual lists one of the following models with no series, it is a Series 1 device. Enter the model number and series as follows. No WiFi or wireless support. An excellent buy for those looking for a good Home Theatre system for DVDs. For sale is a Bose 321 DVD Home Theater system. Model is GS Series II and Media Center is Black with a silver face and comes with silver speakers. System comes complete with the following and all original accessories as shown in the picture. DVD Media Center Receiver Silver. Acoustimass Subwoofer. Acoustimass Cable. Speaker Cable. AC Power Cord. Original setup DVD.
