Contact us STIGA S.p.A. Very convenient unlike the other sites, no popup windows or redundant pics. It's constantly improving and developing. Both file upload and download are very convenient. I believe the download here is faster, and there are no ads at all. Share your pictures, documents, send large videos, exchange music or transfer big files. No registration required. Login to post Your model number comes back to a MTD Yard Man mower. You can go to Briggs website after you get the serial and model of the engine, for a manual on the engine. If you need particulars for the mower follow the link. Yard Man Riding Mower 13AC762F755 It has been, and still is a great mower.

Problem I need front tires. I have wore them out. The Mower is a Quantum 6 Hp Briggs and straton.. The wheels matched exactly. I know how you feels since no one has the model number listed in there books. Is this an error Contradicts everything else Ive read. It has a hydrostatic transmission, front loader, 3point hitch. How do I check all fluid levels Its the on that attaches to the handle need replacement The plastic cover is off and it looks as there is a technic to remove or can I force it off Answer questions, earn points and help others. The aluminum engine was the perfect solution for the recently invented rotary lawnmower due to its lighter weight and lower cost.The idea for his first product came from an upperlevel engineering class project at SDSC. This first product was a sixcylinder, twocycle engine, which Stephen Foster Briggs developed during his engineering courses at South Dakota State. After his graduation, he was eager to produce his engine and enter the rapidly expanding automobile industry. Bill Juneau, a coach at South Dakota State, knew of Briggs ambition and the entrepreneurial interests of Harold M. Stratton, a successful grain merchant who had a farm next to Juneaus farm, so he introduced the two.Briggs purchased an engine patent from A.O.

Smith Company and began powering early washing machines and reel mowers as well as many other types of equipment. The company went public on the New York Stock Exchange in 1928. Some prewar engines were made with aluminum, which helped the company develop its expertise in using this material.Frederick P. Stratton, Jr. served as Chairman until his retirement in 2001. The resulting company is Strattec Security Corporation. The Beacon Group had previously purchased the Consumer Products Division of Generac Corporation now Generac Power Systems in 1998.This joint venture was notable for the manufacture of vertical and horizontal crankshaft engines from 12.5 to 22 hp 16 kW under the Vanguard brand. The completed singlecylinder Vanguard engines were shipped directly to customers worldwide. MHI had exclusive marketing rights under their own brand name in Malaysia, Taiwan, South Korea and Japan. In other countries both companies competed with the same product under their own brand names which led to considerable friction, and together with escalating production costs in Japan, caused this otherwise successful relationship to fail. Production stopped in 2011. It was improved five years later in 1958 with the introduction of the KoolBore all aluminum and SleeveBore aluminum, with a cast iron cylinder liner. The least costly, most common way of complying with the new regulation was to put a flywheel brake on the mower engine, to stop the engine and therefore the blade immediately when the handle was released. The EasySpin lobe hump was moved to the exhaust valve, but this reduced engine performance. Competitor Tecumseh had made a capacitor discharge ignition setup since 1968 for their cast iron engine models, expanding its availability and making it standard equipment on vertical shaft engines powering lawn mowers in late 1976, five years before the advent of the Briggs Magnetron.The logo has the name BRIGGS STRATTON in black letters on the white midsection of the masthead.

The words 4 CYCLE ENGINE are on the red top portion of the mast and the city line MILWAUKEE, WISCONSIN, U.S.A. is written on the black bottom portion of the mast. Although the logo hadnt been changed much since then, the wording on the top and bottom sections of the mast were removed in 1985, although the company continued to use these two sections with the respective wordings ORIGINAL red section and SERVICE PARTS black section until 1989. Some variations includeSome models also had forward neutral and reverse transmissions.The company employs over 3,000 employees in six states. Manufacturing plants are located in Poplar Bluff, MO; Auburn, AL; Statesboro, GA; and Munnsville, NY.By using this site, you agree to the Terms of Use and Privacy Policy. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. KP 5.0 out of 5 stars Installation is easy if you're handy and have the tools needed. There are videos out there on installing this and the rope. You'll need to reuse the cap and little white tabs that engage the flywheel as they are not included. I knew that so wasn't a problem. Mower is up and running again.

Aloha Therefore, note which direction your original part was coiled. When starting any mechanical work, I highly recommend documenting all of your steps at first for referencing. Luckily, I did not have to deal with this particular problem of rewinding the coil; however, the end of the spring that hooks to provide tension was bent in the wrong direction. Therefore, this was an easy fix, but inconvenient since it required additional modifications. After making these modifications and checking to make sure it was catching, the lawn mower works perfect again. Without the youtube videos, this would have been more difficult. I've monkeyed with tensioning the spring on other recoil pulleys a few times, and without the proper tools its typically 30-40 minutes of frustration. For a dollar more than the spring costs at my local hardware store, this assembly came with the spring preset and it took me two minutes to wind the rope and mount the pulley on my tiller. In less time than it takes me to replace a spring, I replaced this and tilled my garden and two flower beds. It appears to be an OEM part and so the quality is identical to the parts when the tiller was new. It is an old tiller and I couldn't read the engine model number, but I could not distinguish this product in any fashion from the one I replaced. Before installing it, you need to make sure the hook on the inner part of the spring is bent in the same direction as your old spring. You can fix this with needle nose pliers. If you don't do this, your spring might eject itself from the plastic housing like mine did, and require you to recoil it. Be smart, don't be like me! I was lucky enough to still have the parts manual for the generator. The new pulley is exactly the same as the old. It was easy enough to install. The spring came separated from the wheel in an otherwise intact original plastic bag. Disappointing That said, I hate that this part is made of plastic. It feels like it should be made of aluminum.
