By this Table of Content, you can jump to the certain topic simply by clicking the Table of content below. This is an article about Canon PowerShot A530 Manual. This article is aimed to provide you the manual of this amazing Canon camera product. Therefore, whenever you need the information about this product, you can simply download it in this page. Further, for the new user, this manual might be helpful to help you understanding this product. While for the old ones, in case you have lost your Canon PowerShot A530 Manual book, the manual below can be treated as a replacement. Contents show 1 Introduction to Canon PowerShot A530 Manual 1.

1 Canon PowerShot A530 Camera Look and Appearance 1.2 The Specification of Canon PowerShot A530 1.2.1 Quick Specification of Canon PowerShot A530 1.3 The Price and Impression of Canon PowerShot A530 2 Canon PowerShot A530 Manual User Guide Introduction to Canon PowerShot A530 Manual What we have sensed since the very first time is that everyone needs the manual of a product, especially for a digital camera product. With this manual, there will be a lot of information obtained. Something like specification, camera parts, function, and others will be so much beneficial to support the operation of this camera. Therefore, we aimed to provide you the Canon Canon PowerShot A530 Manual for a better use of this amazing camera product. Canon PowerShot A530 Camera Look and Appearance Apparently, it is already perpetuated that we need to put Canon Canon PowerShot A530 Manual second after we talked about its specification first. So, as a starting point of the specification, let's concentrate on the whole appearance of this camera. As a compact camera, Canon PowerShot A530 brings truly pocketable body size at 90 x 64 x 43 m. Canon PowerShot A530 manual also says that it is supported by very light overall weight at 220 gram including battery ad card. This dimensions allow you to take this camera anywhere without getting too much problem. At glance, the battery tube looks quite big, but Canon takes an advantage of it by intelligently. This part turns into a hand grip, so it will help you in handle this camera without worries. Plastic is still believed to be the main enclosure material, thanks to the metal brushing for making it more serious. In short, the A530 is built in high quality and timeless style. The Specification of Canon PowerShot A530 Canon is back with the new Canon PowerShot A530. This product was announced right on the 2006's spring at the PMA Show. Getting "the best buy award in photography" in 2006, there is no doubt that the A530 is worth choosing.

Get to know more about this product as explained below. Canon seems to be serious of making this device as a market's wanted by adding 5 million effective pixels sensor. Working well with the CCD technology, it is not difficult to get the most outstanding image at 2592 x 1944. Not only good in capturing image, the AVI 480p video will be clear and bright too. The perfect image can be easily made by selecting the ISO level, JPEG quality levels, ad white balance. All of these settings can be set by just pushing the menu buttons on the right side. On the focus and optic, Canon PowerShot A530 featured builtin lens with 35140 mm focal length and f2.65.5 aperture. This lens offers manual and autofocus modes, feel free to select based on your skill. The flash is more than your expectation by reaching up to 3.5 meter. Supported by Redeye Reduction and AF illuminator, now you can take

more photo in low light area. For connectivity, Canon PowerShot A530 manual explains that the camera has USB 2.0 is ready to transfer your data without needed too much time. It is a suitable selection for light travelerboth in power sources popular AA batteries and size. The manufacturer also chooses MMC or SD card which is pleasant standardization. Now you can start your journey with the A530. Get it starting from 250 USD and show us the result. Read another review about this camera in this page. Canon PowerShot A530 Manual User Guide As it is stated before, this product is classified as the old product. That's why we think some people might lose the manual of it. Therefore, to anticipate this thing, we provide users the Canon PowerShot A530 Manual as a replacement from the old one. On the other side, this manual is not only useful for the users. But it will be helpful too for the one who wants to learn deeper about this camera. Therefore, if you want to understand this camera better, referencing to below manual will be a good idea. The manual will be provided in PDF.

So, if you want to access it, it will be better for you to download the PDF reader first. Download PowerShot A530 User Manual That's all of the Canon PowerShot A530 Manual information that we need to share. Any other idea, opinion, or critique to both these product and articles, the comment session below is available for you. Further, if you think this article is useful, you may share it to your own page. Therefore, the information of Canon PowerShot A530 Manual can be spread in the wider range of audience. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with Canon A530 Manual. To get started finding Canon A530 Manual, you are right to find our website which has a comprehensive collection of manuals listed. Our library is the biggest of these that have literally hundreds of thousands of different products represented. I get my most wanted eBook Many thanks If there is a survey it only takes 5 minutes, try any survey which works for you. Thats a responsibility we take seriously, one that deserves the best effort were capable of.The camera also features a slightly smaller LCD monitor at 1.8 inches. However, many of the A540s excellent exposure options are also found on the A530, with the exception of the Aperture and Shutter Priority exposure modes. ISO lightsensitivity ranges from 80 to 800. An Underwater scene mode even adjusts color balance and exposure for use with an optional underwater housing. This is a camera that offers novice photographers plenty of capability to grow into, and should make a great choice for families or couples with widely varying levels of photo expertise. Get an Aseries, and youre pretty much guaranteed high quality images and good functionality for a low price.

If the underwater virtues of the A530 interest you, take a look at Canons excellent Underwater Photography Guide . In 17 chapters, it covers everything you need to know.The images are sharp and crisp; often sharper than what we see from ultracompact cameras like Canons ELPH series. While the A530 isnt slim, its an easy carry and its extra thickness allows for slightly better optics. The newest ASeries digicams have reduced the battery requirement to just two, so buying a set of four means youll always have a fresh set ready to go. Even with just two, however, we never ran out of gas during a shoot with the Canon A530. Left out for the first time are Aperture and Shutter Priority modes. Were not sure, but Canon may have decided that having two additional modes that many users dont understand was more liability than benefit.Canon doesnt always mean Manual when it says Manual on some cameras offering control over a few more exposure factors, like white balance, than Auto offers. But in the Canon A530s case, it means it.The first is that any Auto mode occasionally disappoints. The solution to those disappointments is often taking some small aspect of control back from the camera. The result of either mode shows a live preview of the exposure change right on the LCD, so you pretty much get what you see. But Canon has used the space intelligently, turning it into a hand grip with most of the A530s weight in the grip. That makes it easier to handhold in low light, giving it a little more resistance when you press the shutter. I did cycle the power an awful lot for the review, but the A530 was responsive. It fired right back up

quickly. I habitually halfpress the shutter button anyway, so it should have been responsive. But halfpressing is something I do just to check focus and exposure options, too. Its a very good habit. Sony has bumped the ISO ceiling up to 1000 in this years Cybershots, obliterating the old 400 limit.

This can be something of a mixed bag, as many have pointed out. The price of higher sensitivity is more noise. In fact, with more megapixels crammed onto the tiny sensor surface, even ISO 400 exhibits more noise than it did in the good old days when a 3Mp sensor was hot stuff. So Ill take the noise. I know what to do with it reduce it. Even Photoshop CS2s default Noise Reduction filter does a very nice job of making the noise in an A530s ISO 800 shot look no worse than that in an ISO 200 shot. My point is that you cant do anything about a blurry shot in your image editing software, but you can do something about noise. Sure, it would be nice to be able to shoot at ISO 800 and not have to edit the shot later but at least you have the shot to edit. You can only get 10 frames per second fps at 640x480, and 20 frames per second at 320x 240, which is a far cry from the 30fps weve come to expect from most digital cameras. You can zoom digitally up to 2x, but not optically. This causes some pixelation, but its better than the noise youd otherwise hear from the zoom lens. Like every other Canon camera, the A530 needs only a USB cable to become a printing kiosk when connected to any PictBridge printer. That means you can leave a set of prints behind when you take shots at a party or just quickly get an index of your latest shoot without bothering to fire up the computer. Its a terrific convenience with the full range of output options, so you really dont give up much. Built on the same longtested design as many Aseries predecessors, the Canon A530 offers a lot in its compact package. Its combination of automatic and manual features make the Canon A530 very approachable for novices, but still interesting for experienced users, the net result being a camera that will satisfy a broad range of interests and provide a good path for novice users to expand their photographic horizons as their experience grows. You can even put it in a waterproof case.

One of the more popular features of the Aseries is their use of AA batteries, something we also like. Id like to see it equipped with a more accurate optical viewfinder the optical path is not straight through the front to the back, and its image noise at ISO 400 and 800 was on the high side, but thats pretty normal. Movie mode is present, but somewhat lacking in terms of frame rate. Still, the A530 is a camera that will meet the needs of the average consumer very well. Its an easy Daves Pick. Canon. It will just fit into a shirt or pants pocket at 3.56 x 2.52 x 1.70 in 90.4 x 64.0 x 43.2 mm and 6.00 oz 170 g. Add about an ounce and a half to this for the batteries. In fact, it shares the same User Guide with the A540. The A540 bumps up the specs a bit with a 6 megapixel sensor, 2.5 inch LCD, aperture and shutter priority modes. These menus provide access to the camera settings that stay more or less consistent across all shooting modes. One such preference that is worthy of special mention is one called "Grid Lines" under the Record menu. Turning this on superimposes grid lines onto the LCD in a 3 x 3 pattern. This can be very useful for checking horizontal and vertical composition and for helping to reinforce the "rule of thirds". I would have liked to have had these in the viewfinder display as well. In the center of the 4way "joystick" or dpad is a button labeled FUNC SET. Pressing this brings up a very intuitive menu of the more commonly changed settings, such as ISO Speed, White Balance, Drive Mode, Metering Mode, and Recording Pixels Capture size, and Flash Compensation. This is a much more efficient way to make changes to these settings quickly. The focus modes and flash modes are easily accessible by using the down and up directions, respectively, on the dpad. The camera feels comfortable in the hand; it has a builtin grip that places the shutter release and zoom control directly under the index finger.

The lens is mounted in a raised area; however, the lens fully retracts into this when the camera is powered off. The zoom control is conveniently colocated with the shutter release button. view large image The back of this camera is quite busy. There is also an optical viewfinder and an option to turn off the LCD viewfinder as well. Images can be captured at resolutions of 2592 x 1944 Large, 2048 x 1536 Medium 1, 1,600 x 1,200 Medium 2, and 640 x 480. A Postcard with Date Imprint mode

captures images at 1600 x 1200 and a Widescreen mode captures images of 2592 x 1456 pixels. There are three settings for quality SuperFine, Fine, and Normal. Movies can be captured at 640 x 480 at 10 fps and at 320 x 240 at 20 fps. Additionally, there is a compact mode for movies that will capture up to 3 minutes at 160 x 120 at 15 fps. The PowerShot A530 lens has a focal length range of 5.8mm — 23.2 mm 35mm equivalent of 35mm — 140mm, giving the camera a 4x optical zoom. The A530 accepts both SD and MMC memory cards. The included 16MB card is rather small in this day. Cards with capacities of 256MB, 512MB, and larger are available. There are 9 shooting modes available on the A530, Aperture and Shutter priority are only available on the A540. In the "Green Zone" of Auto mode, the camera automatically selects settings. This mode is ideal for novice users or for general snapshot use. The "Creative Zone" on the A530 includes "P" and "M" modes. In "P" mode, the camera selects both the aperture and the shutter speed to match the brightness of the subject. "M" mode, manual, is a bit of a disappointment as the values that can be set are dependent upon the zoom setting. The "Image Zone" includes the special icons for Portrait, Landscape, Night Scene, Stitch Assist, and Movies as well as 9 more specialized predefined settings under SCN Special Scene. These include Night snapshot, Kids and Pets, Indoor, Foliage, Snow, Beach, Fireworks, Color accent, and Color swap.

PERFORMANCE AND USABILITY I mounted the Canon Powershot A530 on a tripod and took a series of pictures of a Macbeth ColorChecker in consistent outdoor light, varying the ISO setting throughout the range of possible values, which are ISO 80, 100, 200, 400, and 800. The lowest ISO settings produced the least digital noise grain and most accurate color rendition; however, slow ISO settings are not generally recommended without a tripod, bright sunlight, or flash. The digital noise grain was noticeable at ISO 400 and pronounced at ISO 800. For most, the ISO 100 or ISO 200 settings will produce pleasing images, using ISO 400 in lowlight situations. ISO 80 view medium image view large image ISO 100 view medium image view large image ISO 200 view medium image view large image ISO 400 view medium image view large image ISO 800 view medium image view large image At the wide end of the zoom range, the PowerShot A530 exhibits barrel distortion and some darkening of the corners which is fairly typical of small digital zoom cameras. Barrel distortion view medium image view large image The Special Scene settings SCN on the Mode Dial are very useful and may be thought of as custom programmed modes, specifically tailored for the conditions for which they were designed. While similar results may be obtained with exposure compensation and selective use of aperture and shutter, these are already taken into consideration by the programming of these SCN programs. A much simpler approach. Further, I found that the SCN modes often produced better images in those specific situations than the general programmed mode P on the Mode Dial did. Redeye reduction is available. Pros Handling, Extensive Menu Options, Optical Viewfinder Cons Smallish LCD screen, Manual Mode Limitations. The pages are then spiral bound with a clear acetate front cover and red card back cover, held together with a strong white wire.

Your manual will lay flat when open and will last for as long as your camera, with a little bit of care. Manuals over 400 pages long may be supplied as more than one book. You used to be able to get them here, here or here, but it appears to have been replaced by the A550 which Id get here, here or here. It helps me publish this site when you get yours from those links, too. It seems the same otherwise, although I havent been able to find a panoramic stich assisit mode on the A550. Just get an A550 and youll love it, but watch out if the pan stitching mode is important to you. Its inexpensive, very well made and works great. You can see shots I made on my A70 in my Cayman and Italy galleries. The picture quality will be limited more by your skill as a photographer than by any limitation of the A530. The A530 has more pixels, more features, a better lens and uses less batteries than the A70 did. I live for image stabilization not in the A530 for my indoor nonflash shots of still subjects, but its irrelevant for photos with flash or of moving people. The flash takes a long time to recharge get ready for each shot. Except for sizing to fit the page, this is exactly as the photo

came from the A530. Click for camera original file. If you know what youre doing, youll get great images on the A530. If youre not a good photographer, youll get crummy images regardless of what camera you have. I personally own the fancy gear I do to take care of the other 20% of conditions. Expensive cameras make everything else a little easier and faster for me to make those adjustments, which is important if you use them all day, every day. My dad explained this to me 35 years ago, but I didnt heed his wisdom until 20 years later. Only if you are a virtuoso do differences in piano quality have any significance.

People who dont know how to play piano stay away from them except in hotel lobbies, heh heh, but I have to spend all day helping people who dont know how to photograph who expect the cameras to know how to do everything for them. Such is life. Cameras do almost everything, but like a car going down the road, you still need to make minor corrections to the steering wheel to keep the car in lane.The lack of pointless gimmicks is what keeps the price down. Yes, it still has a lot of scene modes and God knows what else like every other camera, too, if you want them. I have to go through a menu on most other more expensive Canon cameras to do the same thing. I know of no other compact camera that has this important control so easily accessed. This grid are a few light lines that run across the LCD to help get level photos. This is great for night shots on a tripod. My more expensive Canon SD700 cant do this. My fancy Canon SD700 cant do that. I have to use a menu to do the same on my more expensive Canon SD700. If you can afford the SD700, go for it, but if not, dont worry the picture quality is the same. The A530 also has a special mode to help shoot the original images. If you click the image above youll get a huge 5,000 pixel version. The original was over 11,000 pixels wide, as created with the included software and images from the A530. I made this shot from a series of hand held snaps. Id get better results if I used a tripod and if the trees werent blowing. You need one of these or any Canon compact. Of course if you print or display to a constant height, the display or print gets wider. The angle seen by the lens stays the same horizontally, it just crops off the top and bottom. Im exaggerating it here. I never use this. I always use evaluative, the default. This is typical for compact cameras their tiny lenses need such high resolution that smaller apertures would give softer images due to diffraction.
