To get started finding canon digital ixus 60 user manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

canon digital ixus 60 user manual

This product is designed to achieve excellent performance when used with genuine Canon accessories. Conventions Used in this Guide..1 Handling Precautions.5 Please Read. Please be aware of this and take care when operating the camera for an extended period. About the LCD Monitor The LCD monitor is produced with extremely high precision manufacturing techniques. Please consult your camera distributor or the closest Canon Customer Support Help Desk. Do not use substances containing alcohol, benzene, thinners or other flammable substances to clean or maintain the equipment. The battery should not be immersed in water or sea water. Do not attempt to disassemble, alter or apply heat to the battery. Avoid dropping or subjecting the battery to severe impacts that could damage the casing. Exposure to the intense light produced by the flash may damage eyesight. In particular, remain at least one meter (39 inches) away from infants when using the flash. Keep objects that are sensitive to magnetic fields such as credit cards away from the speaker of the camera. Be careful not to cover the flash with your fingers or clothing when shooting. The flash may be damaged and emit smoke or noise. The resulting heat buildup could damage the flash. Exposure to strong magnetic fields may cause malfunctions or corrupt image data. Avoid Condensation Related Problems When moving the equipment rapidly between hot and cold temperatures, you can avoid condensation by placing the equipment in an airtight, resealable plastic bag and letting it adjust to temperature changes slowly before removing it. Shooting Mode Standard No Information Detailed Information View In the shooting modes, the shooting information displays for approximately 6 sec. Changing Settings Using the Set up Menu Changing Settings Using the DISP. Raise the ISO speed p. 64 or select a setting other than the camera to a tripod or other device. Playback Information Playback Mode Standard Total number of images. Basic Guide pp. <http://p-jtech.com/userData/board/danby-dcf401w-manual.xml>

7, 8 Image with the My Colors effect Long Shutter Mode ISO Speed p. 64 Movies Recording Pixels Frame Rate Movies The following information may also be displayed with some images. A sound file in a format other than the WAVE format is attached or the file format is not recognized. The greater the bias toward the left in the graph, the darker the image. The greater the bias toward the right, the brighter the image. If the image is too dark, adjust the exposure compensation to a positive value. Never do the following while a green indicator is flashing. The following menus are available. FUNC. Menu Rec., Play, Print, Set up and My Camera Menus FUNC. Select All Images Set up Menu Menu Item Mute Volume Startup Vol. Please note that formatting initializing a memory card erases all data, including protected images and other file types. Using the SelfTimer You can set a 10 sec. time and the number of shots the shutter button is pressed. These settings, however, cannot be set for the Color Accent, Color Swap, Stitch Assist or movie mode. Standard You can select the recording pixels and frame rate and record until the memory card is full when a super high-speed memory card is used, such as the recommended SDC512MSH. The digital zoom can be used while shooting in this mode. QuickTime for Windows is included on the Canon Digital Camera Solution Disk. On the Macintosh platform, this program is standard with Mac OS X or later. button. The overlap ping seams of several adjacent images can be joined into a single panoramic image. Left to right horizontally Right to left horizontally Shoot the first image in the sequence. The exposure and white balance are set and locked with the first image. The camera detects the subject and highlights

the AF No frame On frames, from 9 available points, that it will use to determine the focus. Subjects with extremely low contrast to the surroundings Scenes with a mixture of near and far subjects. http://lawyersmarketingusa.com/user_upload_image/danby-dcr326bsl-manual.xml

Subjects with extremely bright objects at the center of the composition Subjects that are moving quickly Subjects through glass Try to shoot as close to the glass as possible to reduce the chances of light reflecting back off the glass. To Release the AF Lock Press the button. The AF lock is convenient because you can let go of the shutter button to compose the image. Locking the Flash Exposure Setting You can lock the flash exposure so that the exposure settings are correctly set regardless of the composition of your subject. Turn on the LCD monitor. Use the speed The higher the value, the brighter the image and the lower the value, the darker the image. This camera, however, applies special processing to images shot at shutter speeds slower than 1.3 seconds to eliminate the noise, thereby producing highquality images. A certain amount of processing time, however, may be required before the next image can be shot. The correct white balance may not be obtained when the exposure setting is incorrect image appears completely black or white. Shoot with the same settings as when reading the white balance data. My Colors Settings My Colors Off Records normally with this setting. Emphasizes the contrast and color saturation to Vivid record bold colors. Tones down the contrast and color saturation to Neutral record neutral hues. Use the a My Colors mode.If you press the MENU button at this point, you will return to the screen where you can select a My Colors mode. Changing Colors You can shoot images with the original colors transformed. This can be performed on movies as well as still images, allowing you to enjoy photographing with image or movie effects. Menu Color Accent. The camera will switch to color input mode and the display will alternate between the original image and the color accent image using the previously set color. You may not obtain the expected results after color input mode if you use the flash, or change the white balance or metering settings.

The specified color accent is retained even if the cameras power is turned off. Aim the camera so that the original color appears at the center of the LCD monitor and press the Only one color can be specified. Press the Cycle through the each press of the. The symbol will cease to display after the new folder is created. Up to 2000 images can be saved into one folder. A new folder will automatically be created when you record more than that number even if you are not creating new folders. Up to 2,000 images can be saved into a single folder. New Folder Created Continuous Auto Reset. Use the around the image. Use the to change the image selection. Switching between Sets of Nine Images The jump bar will display if you press the zoom lever toward index playback and you can switch the display between sets of nine images. Jump 10 Images Jump 100 Images Jump Shot Date Jump to Movie Jump to Folder. Display a movie and press Images with a movies. It will resume when you press the button again. When playback ends, the movie stops at the last frame displayed. Protected movies and movies 1 second or less in duration cannot be edited. Select Edit in the movie control panel and press The movie editing panel and the movie editing bar will display. Use the Beginning or button to specify the cut point . The pre edit data is left unchanged.Standard display. The displayed image darkens and the next image gradually brightens until it is displayed. Press the button to have the previous image display from the left and the button to have the next image display from the right. The following selection of My Colors effects is available. For details, see p.57. Vivid Neutral Sepia Positive Film Play Menu See Menus and Settings Use the select an image and. To continue adding effects to other images, repeat the procedures from Step 2 onward.Select Record and press The elapsed time and the remaining time display. Pressing it again resumes recording.

Up to one minute of recordings can be added to any one image. Transition Effects You can select the transition effect used when one image is replaced by another. Up to 998 images can be selected. Adjusting the Play Time and Repeat Settings Play Time Sets the duration that each image displays.

You can also protect images in the index playback mode. You can also select images in the index playback mode. If you are connected to a printer, button will light blue while you are selecting images. The following print settings can be selected. This may cause the date to be printed twice. You can also select images in the index playback mode. Turn off the Camera and the TV. You can change and register these settings, enabling you to customize the camera to suit your own tastes. Changing My Camera Settings My Camera Menu See Menus and Settings. A computer is required to restore the My Camera settings to the defaults. Power is not turned on. Poor contact between camera and battery terminals. Sounds come from the camera interior. The image in the LCD monitor will darken in strong sunlight or bright light. Display flickers. Display flickers when shot under fluorescent lighting. A bar of light red, purple appears on the LCD monitor. Subject is too bright. appears. Consult the nearest Canon Customer Support Help Desk. Slide the write protect tab of the SD memory card upward Confirm the actual image size with the LCD monitor. The camera moves when the shutter button is pressed. Subject is out of focal range. The subject is hard to focus on. Subject in recorded image is too dark. Insufficient light for shooting. Subject is too close, making the flash too strong. The subject is overexposed because the surroundings are too dark. Too much light is shining directly into the camera, or is being reflected off the subject. Continuous shooting slows down. The memory cards performance has dropped. Recording images to memory card takes a long time. Memory card was formatted in another device.

The following types of memory cards are used. Slow recording cards. Cards formatted on a different camera or a computer. Cards which have had images recorded and erased repeatedly. You attempted to play back images shot with another camera or images edited with a computer. File name was changed with a computer or file location was changed. Movies cannot be edited. Some movies shot with another camera cannot be edited. Movies do not play back correctly. Memory card was formatted in another device. Battery will not charge. Battery life exceeded. TV monitor output Image not showing on TV monitor. Camera and printer not properly connected. Printer power is off. Incorrect print connection. Attach the camera to the printer securely with the supplied cable. Power up the printer. Please refer to the Direct Print User Guide for the messages that display during a printer connection. Busy. Image is being recorded to, or read from, memory card. The playback mode is starting up. Image too large. You attempted to play back an image larger than 4992 x 3328 pixels or with a large data size. Incompatible JPEG format. You attempted to play back an incompatible JPEG image. Corrupted Data. Turn the power off and then back on, then shoot or play back. A problem exists if the error code reappears. Note the number and contact your Canon Customer Support Help Desk. If an error code displays directly after taking a picture, the shot may not have been recorded. Battery charge is low. Recharge it as soon as possible it will be used for an extended period. Battery Handling Precautions Keep the battery terminals clean at all times. Dirty terminals may cause poor contact between the battery and camera. Do not bend them, apply force to them, or subject them to shocks or vibration. Turn the camera power off before connecting or disconnecting the AC adapter. Use the following procedures to affix the camera and HighPower Flash to the supporting bracket.

To illuminate the subjects properly, install the flash so that it is up against the side of the camera and parallel with the camera's front panel. If dirt remains, contact the closest Canon Customer Support Help Desk as listed on rear of the European Warranty System EWS Booklet. Subject to change without notice. DIGITAL IXUS 60 Camera Effective Pixels Image Sensor Lens Digital Zoom Optical Viewfinder LCD Monitor AF System Shooting Distance From the front of the lens Direct Print PictBridge compliant, and Canon Direct Print and Bubble Jet Direct compatible My Camera Settings Startup image, startup sound, operation sound, selftimer sound, and shutter sound. Exif Print is a standard for enhancing the communication between digital cameras and printers. By connecting to an Exif Printcompliant printer, the camera's image data at the time of shooting is used and optimized, yielding extremely high quality prints.
