Dynamic range in bright areas is expanded with gradation attributes that are similar to EOS. Also, by changing the exposure index standard from SOS to REI, it is possible to shoot at almost the same brightness with the same Av, Tv, and ISO settings as EOS.The PowerShot G7 X captures stunning HD video 1080p in 60p. Whether viewed online, or played back on a largescreen HDTV using the HDMI output, the results are breathtaking.It starts with the sensor a large and lightgrabbing 1.0inch, 20.2 megapixel highsensitivity CMOS sensor powered by Canons latest generation DIGIC 6 Image Processor for beautifully rendered lowlight photography up to ISO 12800. WiFi and NFCenabled, the Powers hot G7 X is selfieready with a highresolution multiangle capacitive 3.0inch touch panel LCD. Designed to provide stellar images, the Powers hot G7 X is a compact digital camera powered to inspire your most impressive photography.Designed to provide stellar images, the PowerShot G7 X is a compact

digital camera powered to inspire your most impressive photography. The sensor is able to collect more light in a shorter time period without the overflow that causes blownout highlights. This means better detail and more subtle image quality, with rich gradation even at high ISO speeds all the way to 12800. A high signaltonoise ratio delivers minimal noise and distortion with breathtaking dynamic range, particularly notable in bright areas.

And photography enthusiasts will appreciate the changes in image processing for the PowerShot G7 X, which include target exposure value and contrast characteristics of highlights. Thanks to this change, dynamic range in bright areas is expanded with gradation attributes that are similar to EOS. Also, by changing the exposure index standard, it is possible to shoot at almost the same brightness with the same aperture, shutter speed and ISO settings as EOS. The PowerShot G7 X natively captures images in the 32 aspect ratio, which is the same as Canon EOS SLR cameras. Canon DIGIC 6 Image Processor The PowerShot G7 X is powered by the latest iteration of Canons proprietary processor, the DIGIC 6 Image Processor, which takes still and video image quality to a beautiful new level. Improved light sensitivity allows for higher resolution with less noise when shooting in dark conditions, and Dynamic IS now detects and compensates for tilt and parallel movement shift blur to create video thats exceptionally free of distortion. The DIGIC 6 Image Processor also enhances the performance capabilities of the PowerShot G7 X, powering full resolution highspeed continuous still shooting even in P, Av, Tv and M modes and the advanced star shooting modes. The processor allows for MP4 video recording for better compatibility with mobile devices and tablets. Highly compressed MP4 video not only preserves space on your memory card but also improves playback on mobile devices. The new processor also supports an MF Peaking function, giving you a prolevel focusing tool. Canon HS SYSTEM The Canon HS SYSTEM lets you take bright, clear photos as they happen, whether the light is cooperating or not. Beautiful lowlight shots are possible with minimal noise and truly impressive detail in both highlight and shadow areas. The system is the result of two technologies in the PowerShot G7 X the large format 1.

0inch HighSensitivity CMOS sensor, which captures more light; and the DIGIC 6 Image Processor, which actively reduces noise at high ISO speeds up to 12800 and processes images at high speed, even at full resolution. Experience the freedom of using higher shutter speeds in far more situations, allowing you to capture images with exceptional clarity and detail. Equipped with a 9blade Iris diaphragm, the lens lets you achieve a beautiful background defocus with shapes that are nearly round. Capture macro shots from as close as 2.0 in. telephoto at 1.3 ft.. From a design perspective, each of the 11 glass lenses on the PowerShot G7 X has a multilayer coating on it, which is similar to the Super Spectra Coating technology developed for EF lenses. These coatings have features like a high transmission factor, ultraviolet protection, resistant surface hardness, and stable characteristics. The coating also maximizes suppression of unwanted reflected light from ghosting or flaring to deliver clear images with high image quality. In fact, the multiangle LCD encourages creative framing because its easy to achieve a flexible array of camera angles. Capacitive touchpanel operation feels familiar right away simply touch to access quick control settings, focus and shutter release right on screen. A resolution of 1.04 million pixels makes the glarefree display ultra crisp and clear, so its easy to compose your shots, choose camera settings, and review and share your images. Continuous Shooting Gives You the Shot You Want Full Resolution Continuous Shooting and HighSpeed AF Powered by the DIGIC 6 Image Processor, the PowerShot G7 X camera gives you a seamless, highspeed continuous shooting up to 6.5 fps experience thats fully available in P, Tv, Av, M and Auto modes. Shooting and processing are now performed in tandem, reducing buffering time to deliver high shooting speeds. With the significantly higher AF speed, achieving focus nearly the instant the camera is aimed is made possible.

With no separate mode setting and no reduction in image quality, you can freeze brilliant action shots with ease. 31 AF Points With 31 focus points arranged in an expanded, wide pattern across the

image plane, the PowerShot G7 X focuses with admirable speed and precision. Smaller focus frame sizes also make it possible to obtain accurate focus on small subjects. The PowerShot G7 X also supports 1point and Touch AF. Builtin NFC technology also makes it simpler to install the app. If the app hasnt been installed yet, once you touch the devices together for the first time, the download screen will display automatically. You can control the destination of your uploads to share with everyone or to selected groups, and even add comments. Sharing video is also easy with the PowerShot G7 X, which records video using the MP4 format. Mobile Device Connect Button Onetouch connection to your mobile device or computer is also made possible on the PowerShot G7 X with the cameras dedicated Mobile Device Connect Button. When the camera finds a linked computer on the same wireless network, images are sent directly to it. Before uploading images, please be aware that image files may contain privacy related information such as people and places. If necessary, please delete such information. Take Control of Your HD Video Canon Full HD Video with Manual Control Whether youre creating artistic film clips or capturing special occasions, the advanced video capabilities of the PowerShot G7 X camera will get them the attention they deserve. Incredibly realistic 1080p Full HD video is recorded at 60 frames per second with stereo sound in convenient MP4 format. Video is smooth and richly detailed even when played back on a largescreen HDTV via the cameras HDMI output. The MP4 formats small file size lets you fit more on a single memory card, and makes downloading and sharing quicker and easier. In keeping with the cameras sophisticated capabilities, Manual movie mode is also available.

The format keeps file sizes small, so uploading or emailing highquality videos is quick and easy. The iFrame format enjoys native support in compatible Mac and Windows video applications, so you wont need to make timeconsuming conversions that can degrade quality. The system automatically analyzes camera movement and applies the best shake correction method for the shooting situation, allowing you to focus on framing and capturing your shot. For stills, the system selects from Normal IS, Panning IS, Macro Hybrid IS and Tripod modes. When shooting video, the system selects from Dynamic IS, Powered IS, Macro Hybrid IS and Active Tripod IS modes. Icons clearly mark the image stabilization mode, whether youre shooting still images or video. Still Image Shooting Normal IS Corrects for a wide range of camera movement when shooting stills. Panning IS Panning motion is detected so that IS does not interfere with desired camera movement. Macro Hybrid IS Corrects for shifttype camera shake, which typically occurs in macro closeup shooting. Tripod When tripod use is detected, the Image Stabilizer is stopped because it is not needed. Video Recording Dynamic IS Effective for video shooting at wideangle focal lengths, eliminating the unwanted shaking that typically occurs while walking. Powered IS Compensates for hand movement when shooting video at the telephoto end of the zoom range, where camera shake is magnified. Macro Hybrid IS Corrects for motion blur that is likely to occur when shooting video while walking. Also compensates for the shifttype camera shake common in macro shooting. Active Tripod IS When shooting video while using a tripod, the image stabilization is active to compensate for slight camera shake.

Control Designed with Photographers in Mind Convenient control ring, exposure dial, and mode dial provide intuitive manual adjustment Thoughtfully designed controls distinguish the PowerShot G7 X camera as the first of its line, and will satisfy even advanced photographers. The front control ring makes easy setting changes possible, with customizable zoom, Tv and Av assignments. A twolayer exposure compensation dial is easily accessed from the secure, concave thumb grip, and keeps pace as you quickly and actively create images. Capture the Night Sky Like Never Before Star Shooting Mode Starry skies were formerly out of reach to all but experienced SLR camera users; however, star shooting modes on the PowerShot G7 X camera make these wonderfully impressive images accessible to all. With just a tripod and simple settings, you can capture exquisite Star Nightscapes, Star Trails, Star TimeLapse Movies and Star Portraits. In Star Portrait mode, the camera consecutively takes two shots of the subject, plus one of the night sky, and then merges them into a single image, creating beautiful portraits with a starry background. The modes can be performed

fully automatically or with manual controls for extra versatility. Support functions including Night Display, Color Adjustment and Star Emphasis make any starry sky easier to capture. Additional Features HDR handheld no tripod required Although the PowerShot G7 X camera has been designed with an expanded dynamic range for excellent capture of bright areas, high contrast environments can be further controlled with High Dynamic Range shooting mode. In this mode, the camera will shoot three different exposures in succession underexposed, overexposed and normal and then merge them into a single image. Underexposed areas are combined with the overexposed and vice versa, resulting in an evenly detailed image with flattering shadows and highlights.

RAW As with many EOS DSLR cameras, the PowerShot G7 X camera uses a 12bit converter to process the output of the CMOS sensor, resulting in true color, smooth tonal transitions and natural gradations. The PowerShot G7 X lets you shoot in RAW mode, which records all the information captured by the sensor, giving you outstanding flexibility and complete creative control when editing your images with Canons powerful bundled software. The camera also allows you to record in RAW and JPEG formats simultaneously. Now, in RAW mode, you can even select among several aspect ratios, including 169, 32, 43, 11 and 45. ND Filter The PowerShot G7 X camera includes a neutral density ND filter. The ND filter reduces light coming into the sensor, which allows you to set longer exposure times and very wide apertures to create striking photographic effects. Creative Shot The Creative Shot mode featured on the PowerShot G7 X camera can help anyone create images with artistic flair. Rather than randomly applying filters, Creative Shot mode takes advantage of Canons advanced image and scene analysis technology to apply any of the 46 filter options based on the individual scene, subject and exposure. In addition to the original shot, the camera automatically produces and saves five unique variations of the composition by cropping it, rotating it, or adjusting its color, tone, and more. The result is stunning artistic photos that are perfect for sharing. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Naveed Ahmed 5.0 out of 5 stars I found a very good deal from another store, but I bought the Canon Deluxe Leather Case PSC5300BK, Canon Battery Pack NB13L, and Sandisk Extreme SDXC 64 GB memory card through Amazon to be used with this camera.
